

Expert-level test management for **software-intensive** and **AI-enabled** organisations.

Advisory led by a holder of both ISTQB® Certified Tester Expert Level tracks — Test Management (Full) and Improving the Test Process (Full) — a combination held by very few practitioners worldwide, backed by 25+ years of European industrial leadership across Siemens AG, Volkswagen Group, Deutsche Bahn, Alcatel-Lucent and Ericsson AB. We help engineering and quality leaders raise testing maturity, de-risk delivery, and govern quality with measurable rigour.

ADVISORY SERVICES

Test Strategy & Governance

Enterprise and programme-level test strategy, risk-based test policy and quality governance frameworks.

Building & Restructuring the Test Function

Operating models, role design, tooling and metrics for a high-performing test organisation.

Test Management for AI-Enabled Systems

Quality assurance and test governance for AI/ML systems, aligned to ISO/IEC 42001 and the EU AI Act.

Test Process Assessment & Improvement

Certified test-process assessment (ISTQB Expert ITP) and improvement roadmaps aligned to TMMi / TPI and ISO/IEC 29119.

QA Maturity Audit & Benchmarking

Independent diagnostic with gap analysis and prioritised, costed recommendations.

Fractional & Interim Test Leadership

Senior test management capacity on a part-time or transitional basis.

WHO WE WORK WITH

- ◆ Global Capability Centres (GCCs) and shared-services testing functions
- ◆ IT services and software product engineering firms
- ◆ Industrial, mobility and infrastructure organisations
- ◆ Quality and engineering leaders accountable for release risk

ENGAGEMENT MODELS

Diagnostic Sprint

Fixed-scope maturity assessment with findings and roadmap.

Advisory Retainer

Ongoing strategic guidance and governance oversight.

Fractional Leadership

Interim test management on a monthly basis.

Workshops & Coaching

In-house enablement and team mentoring.
