

Turning municipal waste into **sustainability and revenue** for the public sector.

Integrated waste-to-energy strategy and energy-management advisory for governments and public-sector bodies, combining environmental outcomes with bankable revenue. Backed by ministerial-grade strategy work and European industrial energy and sustainability credentials.

ADVISORY SERVICES

Integrated Waste Management Strategy

Segregation-to-energy value chains and phased, fundable roadmaps.

Public-Sector Advisory

Ministerial briefings, policy alignment and public-private partnership structuring.

International Benchmarking

Proven global waste-to-energy models adapted to local context.

Waste-to-Energy Feasibility & Business Case

Technology selection, capex / opex modelling and revenue design.

Energy Management (ISO 50001)

Implementation and certification of energy management systems for public facilities.

Implementation Roadmap & Governance

Phased delivery plans with KPIs and oversight frameworks.

WHO WE WORK WITH

- ◆ State and municipal governments
- ◆ Environment and urban-development bodies
- ◆ Public-sector undertakings and utilities
- ◆ Infrastructure developers and PPP sponsors

ENGAGEMENT MODELS

Strategy & Feasibility Study

Integrated assessment with technology and revenue options.

Ministerial Briefing & Pitch

Decision-grade strategy presentation for leadership.

Implementation Advisory

Phased delivery support and governance setup.

ISO 50001 Programme

Energy management implementation and certification.
